10 Power Switch On / Off

2 power supplies can be connected to provide redundancy. In the event that one fails, the system will continue to operate without interruption. See User Manual for further information.

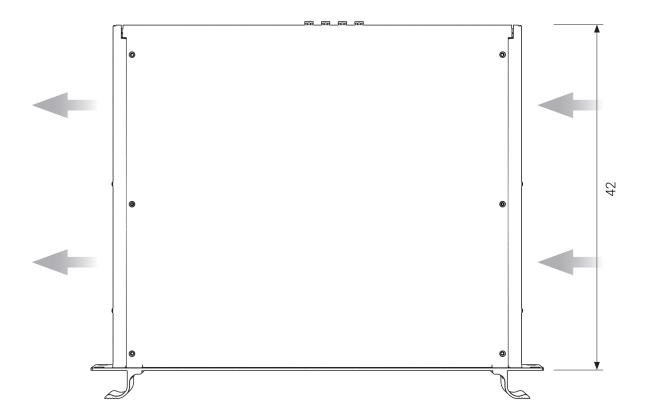

Only use supplied or approved power supply

# Installation

#### Installation

Only either HDMI or HD-SDI can be connected to a given input at any time, connecting both may result in undesirable behavior

Ensure there is adequate spacing around the device for cooling. Cooling air travels in the direction as shown by the arrows.

No vertical loading on the NS8 device.

# Configuration

#### Web Interface

1. Access the Web Interface

#### Via a computer on the same network

#### **DHCP Enabled Network**

From the web browser of a PC connected to the same LAN, navigate to: *device serial*.local - e.g. au2240ns8x1a012.local, or the IP address of the device

#### Non DHCP Enabled Network

Configure the IPv4 network settings of a PC connected to the same LAN to:

IP 192.168.100.102 Subnet 255.255.255 Gateway 192.168.100.100

From a web browser, navigate to: 192.168.100.101

- Device will "fall back" to a static IP address when not connected to a DHCP enabled network - approximately 30 seconds after boot
- Due to the possibility of conflicting IP addresses, only 1 device can be configured at a time. Once configured, the device can remain connected

#### On the device

Press alt+F1 on a connected keyboard

- 2. Login in username & password = admin
- 3. Configure your network
- 4. Select device mode and configure your server on the "System" page

your device will show online in the Harvest Control application

add your device to your Organization via the web portal

#### **User Manual**

Refer to the device User Manual for additional information.

Nodestream devices require specific firewall settings to be in place. Refer to the User Manual for further information

**User Resources** 

### **Troubleshooting**
