Installation

The AVR2 is designed to be mounted in a standard 19" rack and occupies 2U of space

⚠️ Ensure there is adequate spacing around the AVR2 device for cooling. The cool air travels in the direction as shown by the arrows.

No vertical loading on the AVR2 device.

---

(1) Install at all 4 mount points

mount point

(2) Connect Ethernet, video source input, and power cable

📄 The AVR2 device requires an open Internet connection, refer to the User Manual for information on advanced network configuration

Start Up

**1** Switch on the power (on the rear of the AVR2 unit)

> The device is configured to auto start when AC power is applied.

2 The LEDs on the interface panel turn on and the display turns on

3 Once the unit has powered up, the status is indicated by the STREAMING LED

Red	Network error
Blue	Idle
Green	Online and streaming

> The display automatically turns off after 5 minutes. Press **View** to wake the display

Troubleshooting

Issue	Cause	Resolution
Device not powering	PSU switch set to off position AC not connected	Confirm AC connected and switch is in the on position
'No signal' displayed on screen	Video source not connected or powered Damaged cable	Test the video source with an alternate display Change out cable
No network - Streaming LED solid Red	No connection to server	Check Ethernet cable is plugged in Ensure required firewall ports are unblocked (see User Manual) Check network settings, contact your network administrator to diagnose network issues
